Degree	Institute	Year of Passing	Class with Percentage
MCA (Science), University Of Pune	Modern College Of Arts, Science and Commerce	2014	First Class With Distinction
BCA , University Of Pune	MIT School Of Management	2011	First Class With Distinction

Work Experience

Software Engineer
Spring Computing Technologies Pvt. Ltd, Pune
Jan 2014 – Present

Main Projects

1. Free Trade Agreement System

Client Name	PWC
Technology	SQL Server, WCF, C#. Net, ASP. Net, Entity Framework, LINQ, Windows Scheduler
Description	A free-trade area is the region encompassing a trade bloc whose member countries have signed a free-trade agreement (FTA). Such agreements involve cooperation between at least two countries to reduce trade barriers – import quotas and tariffs – and to increase trade of goods and services with each other. If people are also free to move between the countries, in addition to a free-trade agreement, it would also be considered an open border. It can be considered the second stage of economic integration. Free Trade Agreement System is the web application developed using .Net platform.

2. PUFFIN Communications Platform.

Client Name	FCC
Technology	SQL Server, WCF, C#. Net, ASP. Net, LINQ, Windows Scheduler, Windows Services.
Description	PUFFIN is a product which provides a complete solution for communication with customers across various platforms. PUFFIN has features like SMS, email, push, mobile inbox etc. It is a 3-tier application with many back-end components /middle tier web services and the transmitting-receiving components/ front end (UI), it had many backend windows services which were handling MNP, BRM.

3. Gadget Insurance System.

Client Name	SYSKA
Technology	SQL Server, WCF, C#. Net, ASP. Net, LINQ, Windows Scheduler, Windows Services, Entity Framework.
Description	Gadget Insurance System is a web application developed using .Net platform which deals with providing insurance cover for gadgets. This application consists of 3 modules: • Coupon generation: This deals with generating coupons, coupons batches, generating and downloading reports for coupon printing, users and permissions management, offers and free mobile application management which are provided with gadget android app. • Coupon distribution: This deals with distribution of gadget insurance coupons for sale as well as business calculations and billing management. • Claim management: This helps to track and manage all gadget insurance claims by the customer.

4. MLearning (using WPF)

Client Name	Reachout (Product)
Technology	WPF, C# .Net, CLI/C++ layer
Description	This platform provides an easy way to support desktop application in existing LMS. The platform has two components – an mLMS server and a desktop app. The platform requires development of an mLMS adapter for integration with an existing LMS.

5. Face Recognition Application for Windows Desktop (using WPF)

Client Name	Reachout (Product)
Technology	WPF, C# .Net, CLI/C++ layer
Description	This is windows desktop application, which recognizes faces from images, local videos, network stream videos and digital camera if connected to the network

6. Bug Tracking System (College Project)

Technology	VB.Net
Description	Defect Tracking Systems allow individual or groups of developers to keep track of outstanding bugs in their product effectively.
